Beef & Lamb webinars

Neil Brown: Focusing on forage

Date: Wednesday 17 February

Time: 7:00 - 8:30pm

Our Strategic Farmer, Neil Brown from Shropshire, joins KEM Emma Steele to discuss why it's so important to get the most you can from forage and how Neil is working towards that. He's taking steps to reduce hard feed use, the realistic benefits he expects from improving forage use in his business and the changes he's made so far in preparation for grazing 2021.

[Book now](#)

Adrian Coombe: Tame lambs - profit or loss?

Date: Tuesday 23 February

Time: 7:00 – 8:30pm

Our 2019 Strategic Farmer, Adrian Coombe, from Cornwall, joins KEM Leah Shanks to discuss the management of tame lambs. During the webinar they'll uncover why having tame lambs is integral to Adrian's business despite the time and financial investment. We also welcome Farm Economics KEM, David Pett, who will delve into Adrian's costs and profits of artificially rearing tame lambs.

Steven Lawson: The journey to rotational grazing

Date: Wednesday 24 February

Time: 7:00 - 8.30pm

Our Strategic Farmer, Steven Lawson from Northumberland, will join KEM Sam Charlton to discuss the key changes that have taken place on farm during the first year of the programme. This includes the farm's one year transition to rotational grazing, winter feed budgeting, introduction of forage crops and exciting expansion plans. Expect talk about more grass, sheep and profit!

Replacement heifer development: lessons from Nebraska

Date: Thursday 25 February

Time: 7:00 - 8.00pm

Would you like to learn more about the components of successful heifer development? Join Rick Funston, Professor of Animal Science at the University of Nebraska, for a webinar to discuss heifer development. Successful heifer development is underpinned by nutrition, genetics and effective selection. The webinar will be suitable for farmers with suckler herds who breed or are interested in breeding their own replacement heifers.

Herbal leys panel discussion: feeding and grazing management

Date: Wednesday 3 March

Time: 7:00 - 8.00pm

AHDB is supporting a panel discussion from the British Grassland Society on feeding and grazing management of herbal leys. In the fourth webinar of our herbal leys series, the panel will share practical farming experience of managing herbal leys, via short presentations and a Q&A session.

Carbon Week

Carbon Week is a series of AHDB events, taking place from 1 to 5 March.

The webinars and panel discussions will feature a range of speakers and are for farmers and growers interested in understanding more about the carbon cycle, carbon auditing, reducing emissions and the opportunities around this.

Carbon Week webinars

Monday 1 March (12:00 – 1:00pm)

Understanding low carbon farming - this webinar is for levy payers who want to understand more about the carbon cycle and where they fit into it. It will start to look at what actions can be taken to enhance the environment or mitigate emissions, and how this will help their businesses. [Book now](#)

Monday 1 March (7:00 - 8:00pm)

The basics of carbon - panel session - an opportunity to ask a panel of experts any questions you have concerning carbon. Open to all farmers and growers, you can ask any questions about the carbon cycle, carbon foot printing and what action you can take to enhance the environment or mitigate emissions. [Book now](#)

Tuesday 2 March (12:00 – 1:00pm)

Understanding fertilisers, carbon emissions and how to reduce them - Anne Bhogal and Christina Baxter, ADAS will look at how farmers maximise the efficiency of organic materials and fertilisers, understanding how nutrient management can potentially reduce the use of fertilisers as well as the added benefits, such as reduced costs and building soil organic matter. [Book now](#)

Wednesday 3 March (12:00 – 1:00pm)

Carbon Footprinting - save the planet and make money - whether you grow potatoes or produce lamb, join Seth Wareing from The Stabiliser Cattle Company and David Ball from the AHDB Environment Team to explore how measuring your farm's carbon footprint can

not only inform decisions on carbon reductions but also identify opportunities to improve profitability. [Book now](#)

Thursday 4 March (12:00 – 1:00pm)

The ins and outs of carbon in the soil - measurement and management - understanding the importance of carbon in agricultural soils is paramount to meeting environmental goals. Join us for this cross-sector panel discussion aiming to increase the understanding of carbon in agricultural soils, including benefits relating to soil functioning. [Book now](#)

Friday 5 March (12:00 – 1:00pm)

Supply chain requirements - building a narrative - this session explores why we should invest time and effort in measuring and reporting our sustainability and environmental performance and how this information will be required and used within the supply chain. [Book now](#)

Webinar archive

In case you missed it...

AHDB, HCC and QMS and Dr Alex Corbishley, vet and senior lecturer in farm animal practice at University of Edinburgh, hosted a webinar on improving new-born survival on beef and sheep farms, focusing on the importance of colostrum. [Watch now](#)
